

On Taxiway A Approaching Runway 7/25

On Taxiway B Approaching Runway 7/25

If you would like more information,
please contact the Reno-Tahoe
Airport Authority at 775-328-6490.

Runway Safety Best Practices

- Always be alert to airport vehicle and pedestrian activity.
- Ask for progressive taxi instructions if you're unfamiliar with the airfield.
- A good preflight check includes a comprehensive review of your departing/alternate/landing airport diagram.
- Review airport diagrams before taxiing or landing.
- Plan each flight chock-to-chock.
- Don't run checklists while taxiing during single-pilot operations.
- When taxiing during two-pilot operations, remember to have one pilot looking out of the cockpit at all times.
- Maintain situational awareness at all times - Practice the "see and avoid" rule - Observe and maneuver to avoid other aircraft.
- When receiving ATC instructions, listen carefully for similar-sounding aircraft call signs.
- When receiving air traffic instructions, listen carefully to what is being said instead of what you expect to hear.
- Look in both directions and final approach before entering a runway, even after receiving a clearance.
- Speak clearly and concisely to the air traffic control tower.
- Read back all hold short instructions.

RNO

Intl Airport

Runway Safety
Information
February 2008

Reno - Tahoe Intl Airport (RNO) High Alert Areas

The following areas have been designated as Hot Spots, posing a special challenge to pilots. Please review before operating your aircraft at RNO.

- HOT 1 -

Pilots departing the Jet West ramp and following the routes depicted by the red arrows sometimes fail to hold short of Runway 7/25 at Taxiway A, or Taxiway B, as instructed by ATC.

- HOT 2 -

Observe the route depicted by the red arrows for full-length departure. Common mistake is a left turn at Taxiway D.

- HOT 3 -

Observe the route depicted by the red arrows for Northbound travel on Taxiway C. Common mistake is to continue straight ahead into the ramp.

NOTE: NOT FOR NAVIGATION
